

BACHELOR OF SCIENCE DEGREE IN SECURITY STUDIES

The Bachelor of Science degree in Security Studies is a 124-credit program listed with SUNY and approved as a registered degree program through the New York State Education Department. It is designed to serve students currently working in public service, emergency services, law enforcement, and homeland security positions as well as those interested in these career paths. The contemporary security environment is multifaceted and complex. This program addresses that complexity head on by providing coursework in homeland security, research methods and analysis, information security, and a rigorous examination of the social, economic and cultural contexts of security in the United States and internationally. With this learning, students will become more effective in their roles within security and related fields.

Students completing a bachelor's degree in Security Studies will have accomplished the following learning objectives

- Analyze security concerns from various disciplinary perspectives.
- Describe the history, roots and enforcement approaches to national and global security.
- Employ social science research methods and techniques related to the study of security in various forms.
- Evaluate moral and ethical implications of policies intended to address security from social, political, economic, and environmental perspectives.
- Analyze the interrelationship between human and natural environments in the contexts of individual and population security.
- Evaluate strategies and resources employed by law enforcement personnel nationally and internationally related to physical, infrastructure, and human security.
- Evaluate strategies and resources employed to maintain security of information in digital environments.

The curriculum is designed to provide students with foundational courses on which to build pathways of courses specific to their interests and needs. The program design is flexible enough to provide students the opportunity to bring in college level learning obtained through work experience through our prior learning assessment process. Courses in the program are offered online, through independent studies, or through a blended approach. Students may blend different modalities and will work with a faculty mentor to develop a degree plan that matches with their goals.

For additional information about this program, please visit the B.S. in Security Studies web page (<https://www.esc.edu/degrees-programs/bs-security-studies/>).

Admission

For requirements and procedures for applying to the program, please see the information for Bachelor's Admissions (<https://www.esc.edu/admissions/associate-bachelors/>). Enrolling for Fall 2020.
