**NURSING: B.S.N.**

The RN to Bachelor of Science in Nursing (BSN) degree program at SUNY Empire State College is a 124-credit program designed for registered nurses (RN) looking to advance their leadership capabilities and advance their career in healthcare delivery settings.

The RN to Bachelor of Science in Nursing (BSN) degree program includes a set of required courses that all students must take, along with SUNY General Education and other academic requirements (http://catalog.esc.edu/undergraduate/earning-undergraduate-degree/), in order to be eligible to receive a degree. The required courses for the RN to Bachelor of Science in Nursing (BSN) can be found on the “Program Details” tab. Students will work with a faculty mentor to develop a degree plan that matches their goals and meets all program requirements. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.esc.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (http://catalog.esc.edu/undergraduate/earning-undergraduate-degree/#text) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

**RN To BSN Program Admission Requirements**

**RN to BSN program:**

- An admissions application and essay (essay is not required for graduates of SUNY and CUNY community colleges),
- An active, unencumbered New York state RN license, and
- An associate degree or diploma from an accredited nursing program.

The RN to BSN program requires a total of 124 credits completed through a combination of nursing component requirements, transfer credits and credits earned by meeting SUNY Empire State College general learning requirements.

This upper-division nursing program includes online courses and two, community-based, precepted experiences. Most students enroll on a part-time basis and complete the program in 24-36 months.

Students should be prepared to spend approximately the following hours per week (reading, research, discussions, and writing) in a 4 credit hour course:

- 8-week course – 22.5 hours per week
- 15-week course – 12 hours per week

**Elective Requirement**

Examples of nursing courses that can be used to meet the elective requirement are:

- NURS 3035 Interdisciplinary Perspectives in Global Health
- NURS 3040 Foundations of Palliative Care

More than 50 online courses have been approved by the nursing faculty to meet the elective requirement. In addition, the following professional certifications also have been approved to meet the elective requirement:

- AACN Certification Corporation: Certification for Adult Critical Care Nurses (CCRN Adult)
- AACN Certification Corporation: Certification for Neonatal Critical Care Nurse (CCRN Neonatal)
- AACN Certification Corporation: Certification for Pediatric Critical Care Nurses (CCRN Pediatric)
- AACN Certification Corporation: Certification for Progressive Care Nurses (PCCN)
- American Board of Neuroscience Nursing (ABNN): Certified Neuroscience Registered Nurse (CNRN)
- American Board of Peri-anesthesia Nursing Certification: Certified Ambulatory Peri-anesthesia Nurse (CAPA)
- American Board of Peri-anesthesia Nursing Certification: Certified Post Anesthesia Nurse (CPAN)
- American Board of Wound Management (ABWM): Certified Wound Specialist (CWS)
- American Heart Association (ACLS)
- American Heart Association (PALS)
- American Nurses Credentialing Center: Certified Gerontological (ADN) Nurse
- American Nurses Credentialing Center: Psychiatric and Mental Health Nurse Generalist
- Board of Certification for Emergency Nursing: Certified Emergency Nurse (CEN)
- Competency and Credentialing Institute: Certified Perioperative Nurse (CNOR)
- Medical-Surgical Nursing Certification Board: Certified Medical-Surgical Registered Nurse (CMSRN)
- National Board for Cert of Hospice and Palliative Nurses: Certified Hospice and Palliative Nurse (CHPN)
- Nursing Case Management Certification (ANCC)
- Oncology Nursing Certifications Corporation (ONCC): Certified Breast Care Nurse (CBNC)
- Pediatric Nursing Certification Board: Certified Pediatric Nurse (CPN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Continence Care Nurse (CCCN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Ostomy Care Nurse (COCN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Wound Care Nurse (CWCN)

More than 50 online courses have been approved by the nursing faculty to meet the elective requirement. In addition, the following professional certifications also have been approved to meet the elective requirement:

- AACN Certification Corporation: Certification for Adult Critical Care Nurses (CCRN Adult)
- AACN Certification Corporation: Certification for Neonatal Critical Care Nurse (CCRN Neonatal)
- AACN Certification Corporation: Certification for Pediatric Critical Care Nurses (CCRN Pediatric)
- AACN Certification Corporation: Certification for Progressive Care Nurses (PCCN)
- American Board of Neuroscience Nursing (ABNN): Certified Neuroscience Registered Nurse (CNRN)
- American Board of Peri-anesthesia Nursing Certification: Certified Ambulatory Peri-anesthesia Nurse (CAPA)
- American Board of Peri-anesthesia Nursing Certification: Certified Post Anesthesia Nurse (CPAN)
- American Board of Wound Management (ABWM): Certified Wound Specialist (CWS)
- American Heart Association (ACLS)
- American Heart Association (PALS)
- American Nurses Credentialing Center: Certified Gerontological (ADN) Nurse
- American Nurses Credentialing Center: Psychiatric and Mental Health Nurse Generalist
- Board of Certification for Emergency Nursing: Certified Emergency Nurse (CEN)
- Competency and Credentialing Institute: Certified Perioperative Nurse (CNOR)
- Medical-Surgical Nursing Certification Board: Certified Medical-Surgical Registered Nurse (CMSRN)
- National Board for Cert of Hospice and Palliative Nurses: Certified Hospice and Palliative Nurse (CHPN)
- Nursing Case Management Certification (ANCC)
- Oncology Nursing Certifications Corporation (ONCC): Certified Breast Care Nurse (CBNC)
- Pediatric Nursing Certification Board: Certified Pediatric Nurse (CPN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Continence Care Nurse (CCCN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Ostomy Care Nurse (COCN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Wound Care Nurse (CWCN)
In completing their academic program, nursing students come into the nursing program to prepare nurses to function as professional nurses.

**Professional Expectations**

The nursing program prepares nurses to function as professional nurses. In their coursework, students are expected to:

1. Integrate knowledge from the nursing, biological, and social sciences, and the humanities to provide culturally competent care to individuals, families, and communities;
2. Apply a variety of communication strategies in establishing positive relationships with patients, families, and members of the healthcare team;
3. Use evidence and information technology to enhance patient safety and promote quality care outcomes;
4. Integrate principles of leadership in promoting collaboration with interdisciplinary teams;
5. Analyze how the baccalaureate-prepared nurse develops professional role identity, including consideration of values, and legal and ethical aspects to nursing practice.

Students are expected to design predetermined and personal learning objectives. Students design practice experiences with a faculty member in collaboration with a local preceptor.

These courses are completed near the end of the program and are offered in the fall, spring, and summer terms. Advance planning to integrate the clinical experiences and course work into employment and family schedules is required. The faculty recommend that students begin the planning process at least six months before course registration.

Students initiate the planning process by contacting the School of Nursing's clinical coordinator to receive approval for both the preceptor and clinical agency. This contact should be made by Oct. 1 for a spring precepted experience, Feb. 1 for a summer precepted experience, and June 1 for a fall precepted experience.

**Guidelines For Practice Experiences**

The Community Health Nursing course requires 45 direct practice experience hours working with a preceptor in a community health setting. This course focuses on community health nursing and involves viewing populations and aggregates as the client. Some examples are entire communities within a geographic region, migrant workers, teen parents, older adults, veterans, or children with special needs. Some examples of appropriate settings include a public health agency, school, community hospice, and parish nurse program or outpatient clinic with community outreach programs.

The preceptor for this experience must be an experienced RN with a minimum of a bachelor's degree in nursing. In some instances, upon approval from the dean or her designee, a professional colleague from another licensed health care discipline, such as a physician or social worker may be deemed an appropriate preceptor for the clinical practice experience.

The Baccalaureate Nursing Capstone requires 90 direct practice hours over the 15-week term. This is a nursing leadership course with four specialty tracks, including administration, clinical, education, and informatics. Students choose practice sites based on their area of interest. Examples of appropriate settings include a hospital, long-term-care facility, school, clinic, medical office or hospice. Community settings also may be utilized as long as the experience focuses on leadership. The preceptor must be an experienced RN in a leadership role with a minimum of a bachelor's degree in nursing.

**Undergraduate Precepted Practice Experiences**

Precepted practice experience requirements are embedded in the Community Health Nursing and Baccalaureate Nursing Capstone courses. These practice experiences are designed to meet both predetermined and personal learning objectives. Students design practice experiences with a faculty member, in collaboration with a local preceptor.

These courses are completed near the end of the program and are offered in the fall, spring, and summer terms. Advance planning to integrate the clinical experiences and course work into employment and family schedules is required. The faculty recommend that students begin the planning process at least six months before course registration.

Students initiate the planning process by contacting the School of Nursing's clinical coordinator to receive approval for both the preceptor and clinical agency. This contact should be made by Oct. 1 for a spring precepted experience, Feb. 1 for a summer precepted experience, and June 1 for a fall precepted experience.

As noted by the ANA, The Standards of Professional Performance (2010) are as follows:

- The Standards of Professional Performance describe a competent level of behavior in the professional role, including activities related to ethics, education, evidence-based practice and research, quality of practice, communication, leadership, collaboration, professional practice evaluation, resource utilization, and environmental health.
- All registered nurses are expected to engage in professional role activities, including leadership, appropriate to their education and position. Registered nurses are accountable for their professional actions to themselves, their health care consumers, their peers, and ultimately to society.

By the end of the program, graduates will be able to:

1. Integrate knowledge from the nursing, biological, and social sciences, and the humanities to provide culturally competent care to individuals, families, and communities;
2. Apply a variety of communication strategies in establishing positive relationships with patients, families, and members of the healthcare team;
3. Use evidence and information technology to enhance patient safety and promote quality care outcomes;
4. Integrate principles of leadership in promoting collaboration with interdisciplinary teams;
5. Analyze how the baccalaureate-prepared nurse develops professional role identity, including consideration of values, and legal and ethical aspects to nursing practice.

The remaining 79 credits are obtained via the transfer of credits and by completing SUNY Empire State College general learning requirements. Students are required to meet all of the SUNY undergraduate General Education Requirements outlined in the Undergraduate Catalog.
